PRODUCT SPOTLIGHT

RENEW, RESTORE, REVIVE YOUR SKIN FOR SPRING

Each season brings its own unique set of skin challenges that require protection. For most, the winter season can leave skin feeling dry, scaly, and dull. As spring approaches, it's time to renew and revive that dull, dry skin.

The ARTISTRY® **intensive skincare 14-night restore program** is a restorative, seasonal skin treatment that recharges skin, improving its natural ability for repair and correction. **14-night restore program** offers seven levels of restoration, including:

- Boost skin's natural ability to repair signs of damage
- 99% reduction in visible fine lines
- 95% of panelists felt the product was gentle and mild on their skin
- 98% moisture improvement after 14 days
- 83% reduction in skin roughness
- 71% of panelists felt that their skin was less stressed and more toned

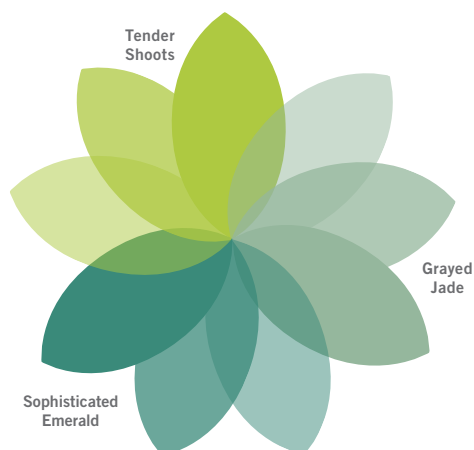

Get started with this special **intensive skincare** treatment today and greet spring with a healthy looking glow and firmer, more youthful looking skin.

TRENDS

PREPARE FOR AN ENCHANTED SPRING

From Pantone® Fashion Color Report for Spring 2013

The prevalence of green this spring is undeniable. Similar to the many shades in our natural surroundings, this season's greens offer a stunning foreground or the perfect backdrop for all other hues. Like the first signs of spring, Tender Shoots is a vibrant yellow-green that's invigorating, active and cheerful; while Grayed Jade, a subtle, hushed green with a gray

undertone, brings about a mood of quiet reflection and repose. Sophisticated Emerald – a lively, radiant green – inspires insight and clarity while enhancing our sense of well-being. From one extreme to the other, combining all three greens presents an intriguing choice much like Mother Nature intended.

TIPS AND TRICKS

ENSURE A BRIGHTER FUTURE FOR YOUR SKIN

Safeguarding your skin against the sun's damaging rays is the key to looking younger longer. Take these tips with you on your spring break trip to ensure you and your skin have a fantastic time!

- 1. Plan ahead.** Using a skincare product with at least an SPF of 15 should be part of your daily anti-aging skincare regimen. But long days spent in the sun require a more aggressive approach to protection. Apply sunscreen over your entire body at least 15 minutes before you get dressed to head outdoors.
- 2. Don't skimp during application.** An ounce of sunscreen may feel like a lot of product, but Robert A. Weiss, M.D., associate professor of dermatology at Johns Hopkins University School of Medicine, says this is the recommendation for full-body coverage. For those areas that will have extended exposure, be extra generous when applying your sunscreen product.
- 3. Keep track of your time outside.** Re-apply sunscreen every two hours. Make sure to re-apply after every significant sporting activity or water submersion.

Use ARTISTRY TIME DEFIANCE® [UV Defense SPF 50 Ultra Facial Sunscreen](#) on your face during the highest levels of sun exposure to deflect damaging UVB/UVA rays and environmental assaults. Moisturizing and fast-absorbing, and with an exclusive Balanced Brightening Complex, this sunscreen will help shield skin against dark spots and discoloration.
